Berlin, NH 03570

Dear Pat:

New Hampshire Employment Security - NHWORKS is excited to be a partner with the various regional jurisdictions which are joining together to apply for TIGER funding to carry out an innovative pavement management program. I understand that these jurisdictions include Berlin, Gorham, Shelburne, Milan, Dummer, Colebrook and NHDOT District 1. All of these townships fall within our office coverage area. This program will greatly improve the road network infrastructure in this chronically distressed portion of the state.

New Hampshire Employment Security - NHWORKS deals with and daily serves the many people in the region who are unemployed or underemployed and having a difficult time making ends meet. The project will benefit our service population greatly over the long term. We definitely will do everything we can to work with the project to involve and employ qualified members of our service population in the significant construction portion of this project. This is a rare opportunity for us to utilize these people in meaningful jobs and work which have been very scarce in this region.

Sincerely,

Mark Belanger
Manager - Berlin
