Dear Respective Councilmen & woman: I am writing today to request for your consideration a cross walk be put in place on route 16. At the point of Morning Lane crossing over to the northern driveway to the WMCC. The school on a regular basis has children from their child care facility attempting to cross at this location. As do several of the residents, one being legally blind. It is not feasible for anyone to travel down the side of Route 16 for the distance cut off from the sidewalk located at the southern end of the WMCC driveway. There is no space allotted for strollers to travel as it does not even have a break down lane. This is a heavily traveled route with it being the main route through NH. At this time there is only a cross walk located between the admin

istrative offices and the WMCC facility. By placing a cross walk at Morning Lane it would make the cross over to the parking lot where foot traffic travels more safely to access the sidewalk located at the southern end of the WMCC driveway. Thank you very much for considering my request for this safety element, I look forward to hearing from you in the near future.
