Subject: Community Street Parking

Hi Mike,

During sporting events at Community field, cars are parking on both sides of the street and sometimes double parked (unloading gear) in the south bound lane at the intersection causing a restriction in traffic flow to and from the facility. There are times when the path in the street is barely wide enough for our personal vehicles, and it's near certain that large trucks and emergency vehicles would not get through.

For safety we are requesting that the city restricts parking along the inside curve from the entrance of Community Street to the beginning of the westerly straight stretch of road on the north side of the ball park. We also request that parking be not be allowed on both sides of Community Street except for the short stretch of road beyond the facility Administration parking lot entrance.

I look forward to reviewing this problem with you and hopefully we can come up with a parking scheme that satisfies both our needs.

Thank you
