Subject: Street sign

Hello,

My name is Angela Collins and I live on High Street in Berlin. I have 2 autistic sons; one is nonverbal and the other has some language skills. They are ages 8 and 6. My youngest has been known to get out and run down the street or sometimes in the street itself. This is a high traffic area with vehicles driving by at times with an accelerated speed. I am writing this email asking that a street sign that says "autistic child area" be put up on our street. I do believe this will help people driving by to at least slow down and with the hopes of it making the community more aware of a child in the neighborhood who may not understand that being in the middle of the street is dangerous or beeping your horn for them to move may not work.

Please let me know what I can do to help. I appreciate your time and consideration. I look forward to hearing from you.

Thank you,

Angela
