Subject: Crosswalks at River Walk

To Whom It May Concern:

As the River Walk is becoming increasingly used, pedestrian safety at the crosswalks should be of increasing concern.

Eight crosswalks exist along the city's new River Walk. All but one (Ninth St.) have a solar lamp post near them (on the east/river side of the street) and all but one have a utility pole on the west side of the street.

I am writing with the hope that the Berlin City Council/Public Works Dept. may consider the following for a future agenda:

- 1) The current crosswalks are fading, especially since paint has been worn off by traffic tire wear. These should be repainted as needed and the use of a photoluminescent (glow in the dark) paint might be considered-see enclosed example from Allureglow USA (other vendors exist).
- 2) The installation of crosswalk signage on both sides of the road-see enclosed ideas. In my opinion, the reboundable crosswalk signs might be the most effective but not necessarily the most practical. Solar LED lighted signs would be the next best and, finally, non-lit signage would be 3<sup>rd</sup> best.

These should be installed at all crosswalks and on both sides of the street. In most instances, perhaps the utility poles and the street lamps could be used for this purpose.

At the very least, the crosswalk at 11<sup>th</sup> St. should be marked and other high-traffic crosswalks should be studied and considered.

Like many others, I enjoy and use the River Walk very often.

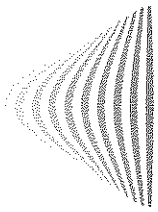

**Only very few vehicles are stopping at these crosswalks. The many that do not are violating State RSA 259:17 (Bicyclists and motorists must yield to pedestrians in a crosswalk, whether the crosswalk is marked or not.....).**

Thank you for your consideration of this concern.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve McCosh", written in a cursive style.

Steve McCosh
