

CLEANING AND MAINTENANCE OF GREASE TRAPS/INTERCEPTORS

1. Shut off flow valve if available.
2. Skim grease from trap/interceptor and deposit in watertight container.
3. Bail water from trap/interceptor and dispose of in sanitary sewer.
4. Remove the baffles, if possible.
5. Scrape the sides, lid and baffles with a putty knife and deposit grease in watertight container.
6. Contact a hauler or recycler for pickup.
7. Replace the baffles and lid.
8. Record volume of grease removed in the log.
